Subject: Public Comment on Prop 65 NSRL
Date: Friday, June 02, 2017 4:57:07 PM

Dear Sirs,

I am writing today out of concern for the amount of glyphosate allowed on the NSRL. I request that the Prop 65 NSRL (No Significant Risk Level) for glyphosate must be a validly arrived at NSRL, per CA regulations, substantially lower than the proposed 1100 micrograms per day, in order for this Safe Harbor to actually be safe to Californians. Until a comprehensive independent study is done, showing real life exposure levels, regulatory authorities should use a NSRL of well below 0.0001 micrograms/day, (Thongprakaisang et al., 2013), the level where breast cancer has been detected, in keeping with The Precautionary Principle.

Thank you!
Sincerely,
James
